

Applied Plant Science Seminar Series--Fall Semester Schedule
Monday, 3:30—5:00, 306 Borlaug Hall, St. Paul Campus
Seminar Series Theme: Sustainable Development of Multifunctional
Landscapes

Date	Presenter	SeminarTopic		
Sept, 8	Organizing meeting	Seminar course discussion		
Sept. 15	Nick Jordan	"The Koda Energy Project: Growing a Multifunctional Fuelshed"		
Sept. 22	Carroll Vance	"Legume Genomics: Importance to Sustainability, Human Health, & Ecological Services"		
Sept. 29	Matt Cavanaugh	"Converting Kentucky Bluegrass to Low Maintenance Turfgrass Species"		
Oct. 6	None	No seminar ASA, CSSA Annual Meeting		
Oct. 13	Clarence Lehman	"The New Agriculture of Bioenergy and How It Will Fix the World's Climate"		
Oct. 20	Jerry Cohen	"The Role of Stress in Regulation of Auxin Metabolism"		
Oct. 27	Matt Clark	"Genetic Improvement of Prairie Junegrass (<i>Koeleria macrantha</i>) for Low-Input Turf"		
Nov. 3	Susan Galatowitsch	"From Lawns to Lakes: Fate and Consequences of Nutrients in Urban Ecosystems"		
Nov 10	Ben Clasen	"Understanding and Reducing the Invasive Potential of Some Common Horticultural Crops"		
Nov.17	Magan Friskop	"Stover Quality and Its Impact on Production Values of Corn for Food and Fuel"		
Nov 24	Matt Leavitt	"Exploring the Effectiveness of Fall-Planted Cover Crops in Organic Vegetable Production"		
Dec. 1	Peter Gillitzer	"Bioenergy Potential of Passively Managed Grasslands"		
Dec. 8	Brian Seda	"Identifying a Source of Durable Leaf Rust Resistance in Wheat and Its Ability to Break the Corn-Soybean Rotation"
